

## Free experience report

- Preparation (planning, organization, and application with the host university)

The application for the host university was easy, as everything was explained in a special seminar. Moreover, in our Master's program it was obligatory to apply for a host university, so the procedure went very smooth as some of the preparations have been done for us.

- Lodging

I had to find accommodation by myself. I found it very quickly in Facebook group 'Accommodation in Copenhagen', but I know that some of my classmates had troubles with finding accommodation, so I was very lucky here. Of course it was not cheap, but almost everything in Copenhagen is expensive compared to Germany.

- Studies at the host university

I enjoyed my studies in University of Copenhagen very much. They have all the modern equipment, the courses were up to date and very interesting. Teachers were always ready to help.

- Daily life and free time

I liked my life in Copenhagen. It was fun to live on my own, study, and just enjoy the city. In my free time I was doing yoga in a studio, and I met wonderful people there.

- Summary (best and worst experience)

I don't have much to complain about my time there, I enjoyed every single day. Perhaps the worst experience is the darkness in wintertime, when the sunset occurs around 3-4 pm. The best experience is just to live in a big city, which contrasts with life in Hohenheim very much. Lots of people, there is something going on in the city all the time, lots of possibilities to spend your free time or to travel - take a one-day trip to Sweden, go to Oslo by ship, and others. Very interesting time, I can only recommend to go to Copenhagen and study there.
